

1. A complex variety of this quantity includes an imaginary term proportional to the electrical conductivity over the angular frequency. Cauchy's Formula gives this quantity as a function of one over the wavelength squared. The Maxwell Relation approximates it as the square root of the dielectric constant, and the ratio of this quantity for two materials is equal to the ratio of the (*) sines of the incident angles by Snell's Law. For 10 points, name this quantity that gives the ratio of the speed of light in a vacuum to the speed of light in a material.

ANSWER: index of refraction [or refractive index; prompt on n]

003-09-6-02102

2. The American Anti-Imperialist League formed to oppose this war, which was encouraged by reports about the cruelty of "Butcher" Weyler. The *USS Oregon* sailed over fourteen thousand miles to participate in this war. During this war, one commander issued the directive "you may (*) fire when ready, Gridley," and the U.S. won the battles of Las Guasimas and El Caney. The U.S. emerged as a naval power by winning the battles of Santiago and Manila Bay during this war. For 10 points, name this war, sparked by the explosion of the *USS Maine* in Havana, which resulted in the United States taking control of the Phillippines and Cuba.

ANSWER: Spanish-American War

004-09-6-02103

3. As a signaling molecule, this molecule can activate P2 membrane receptors. Paul Boyer showed that the purpose of a certain proton gradient is to remove it from its namesake synthase. During muscle contraction, the heads of the myosin molecule hydrolyze this molecule. In plants, this molecule is synthesized in the (*) thylakoid membrane of the chloroplasts. Two molecules of it are synthesized as the end product of glycolysis. For 10 points, name this compound that is sometimes referred to as the "energy currency" of the cell.

ANSWER: **ATP** [or adenosine-5-triphosphate]

040-09-6-02104

4. An autobiographical work by this author begins by describing days, months, and years as travelers of eternity. He abandoned his early "shriveled chestnuts" style. One of his later poems focuses on the sound of water as a frog jumps in to a pond. This author of *The* (*) *Narrow Road to Deep North* lived in the Genroku era. He used *kigo*, or "season words," richly in his works. For 10 points, what poet, who traveled around Japan under the Tokugawa Shogunate, was a master of the seventeen-syllable *haiku*? ANSWER: Matsuo <u>Basho</u> [or Matsuo <u>Munefusa</u>]

034-09-6-02105

5. In 1996 the "Defence Line" surrounding this city became a UNESCO World Heritage Site. Just east of this city is the neighborhood of IJburg (A-burg), which is built on artificial islands. This city is on the southwestern shore of the IJsselmeer (A-sell-mere), a freshwater remnant of the (*) Zuider Zee (ZI-der ZAY). It is sometimes known as the "Venice of the North" for its many canals. This city is served by Schiphol airport, which, like most of this city, is located below sea level. For 10 points, name this largest city in, and capital of, the Netherlands.

ANSWER: Amsterdam

6. This composer reused a triplet motif from his Romance for Piano for Six Hands in the second movement of a work by him, which begins with piano chords and low Fs that resemble the tolling of (*) bells. Another work by this composer is based on a painting by Arnold Bocklin and uses the Dies Irae theme. This composer wrote variations on a violin caprice in his Rhapsody on a Theme of Paganini. For 10 points, name this Russian Romantic composer of The Isle of the Dead.

ANSWER: Sergei Vasilievich Rachmaninoff

036-09-6-02107
